CSE468 Report

Submitted by

Omar Faruk Riyad
Arif Ur Rahaman Chowdhury Suhan

Duration : Last whole week

1 Introduction:

Human visualization is a sweet gift from The Almighty Creator.And we know it can't be perfectly replicated into a thing so that a machine can see.But the blind saw dream and we got hope.After the birth of Machine Learning, Computer Vision started a new era.

In this report, we basically focused on the feature extraction rather than developing a classification model. Using various kind of features

2 Literature Review:

2.1 1-NN:

It is a simple algorithm for single classification.

2.2 Metrics:

2.3 Features:

A Feature describes charactristics or information present in an image.

3 Experimental setup:

4 Resutls and discussion:

5 Conclusion:
